

**Purpose of the Document**

This document will provide you with key information about this investment product. This is not promotional material. The provision of this information is required by law to help you understand the nature, risks, costs, potential returns and losses associated with this product and compare it with other products.

Product: Amortization Forward  
 Creator: AKCENTA CZ a.s. (www.akcenta.eu)  
 Competent supervisory authority: Czech National Bank  
 Date and time of issue: 01/01/2024 8:00

**Warning**

The product you are considering buying is complex and may be difficult to understand. The product is not suitable for every investor. The product is suitable for an active investor who has experience and is aware of investment risks.

**I. What product is it?**

**Type**

The amortization forward is based on the same principles as the standard forward, i.e. a precisely defined amount is hedged at a fixed rate with only a variable maturity date. The predetermined forward settlement date is replaced with an agreed period during which the exchange can be made at any time at the agreed rate. Individual drawdowns do not have to be specified in advance, they can take place on any business day in a given period and in any amount up to the total amount of the agreed amortization forward. All drawdowns during the term of the amortization forward until maturity are at the originally agreed forward rate. There are no fees for concluding an amortization forward and it can be concluded for an unlimited term (up to 1 year as standard, individually or longer).rd trade and it can be entered into for an unlimited period of time (up to 1 year as standard, individually or longer). There is no limit on the number of such trades or their maximum amount. A trade is binding at the moment of arranging the transaction.

**Goals**

If the customer has difficulty estimating the future maturity of incoming payments or liabilities, the use of an amortization forward may be convenient. In this case, the product provides the client with maximum flexibility and the security of a fixed rate, along with the possibility to make better use of the fixed rate in financial planning calculations.

**Intended customer**

This product is only suitable for corporate customers who have sufficient experience in hedging against currency risks. As the market rate may develop differently from customer expectations, it is necessary that customers are aware of this risk and are able to bear any financial loss from a negative development. Customers are assumed to have a high tolerance for risk and understand the consequences and risks associated with trading these products.

**II. What risks am I taking and what return could I achieve?**

Risk indicator:

The risk indicator assumes that you will keep the product for the entire maturity period. The actual risk may be significantly different if the customer divests early. This product is a high-risk product. The prices of the underlying assets can fluctuate considerably in a short period of time and the customer may suffer a significant unlimited loss.

All derivative contracts are legally classified as 7, which is the highest risk class. The product has been placed in this category based on its character. Its performance for the customer is dependent on the future development of market rates.

**Performance scenarios**

The amortization forward example is based on realistic grounds. The example may not exactly match the specific terms of your contract.

#### Example for EUR buyers – AMFW FWD EURCZK purchase for 1 year, amount of EUR 100,000

Position scenario	Opening rate of the position	% change in rate	Referential fixing at maturity	Profit / Loss [CZK]
Stress	25,100	-1,50%	24,724	-37 600,00
Unfavourable	25,100	-0,50%	24,975	-12 500,00
Moderate	25,100	0,30%	25,175	7 500,00
Favourable	25,100	1,00%	25,351	25 100,00

The scenarios presented are estimates of future performance based on past facts regarding rate developments and are not an accurate indicator. The stress scenario shows what you can get back or what you will have to pay in extreme cases. These figures include all costs of the product itself. The figures do not take into account your personal tax situation, in particular the tax regulations of your home country, which may also affect the success of your investment.

### III. What happens if AKCENTA is unable to make a payment?

If AKCENTA fails to meet its obligations under this product or is unable to make a payment, you may lose all or part of your payment or suffer an unlimited loss. This product is not protected by any deposit insurance scheme, statutory or other insurance.

### IV. What costs are associated with the investment?

The costs shown below are based on a hypothetical trade reflecting current market prices. The specific costs you may incur in purchasing such a product may vary and will depend on market prices at the time of purchase. These amounts represent the cumulative cost of the product itself for the recommended holding period (assumed 365 days). The table below shows the impact of each cost on the return on investment.

<b>One-off costs</b>	The fee is charged when the transaction is opened.	0%
<b>Running costs</b>	Subsequent running fees associated with holding product positions/fees in the underlying asset market.	0%
<b>Collateral composition</b>	The amount of collateral is based on the size of the investment and the financial stability of the client. The collateral is deposited in a separate client IPA.	1-11%
<b>Incidental costs</b>	Performance fees/Capital appreciation fees.	0%

The person selling or advising you about the product may charge you different costs. If so, this person will provide you with information about these costs and explain the impact that all the costs will have on your investment over time.

### V. How long should I hold the investment? Can I withdraw money early?

The recommended holding period is the same as the agreed maturity date. The customer is not entitled to unilaterally withdraw from the product before the end of the contractually agreed holding period. Depending on the market value of the product, the customer may make a profit or loss upon termination.

### VI. How can I make a complaint?

All the necessary information for the handling of complaints and claims can be found at <https://www.akcenta.com/claims-form>. The details are listed in the Claims Policy, which is also available on the website. Under the conditions set out in the legislation, you can contact the Czech National Bank ([www.cnb.cz](http://www.cnb.cz)) or the Financial Arbitrator ([www.finarbitr.cz](http://www.finarbitr.cz)).
